

# SA

SENIOR SOFTWARE ENGINEER | AWS CERTIFIED | 8+ YEARS EXPERIENCE

# SÓSTENES APOLLO

## SUMMARY

Full-Stack Web Developer with 8+ years of experience delivering production-grade, high-performance backend systems and scalable web applications. Strong expertise in Node.js, TypeScript, and React, building real-time transactional platforms for enterprise and fintech environments. Experienced in cloud-native deployments, microservices, and data-driven pipelines, with proven ability to optimize high-volume, low-latency services. Skilled at collaborating with cross-functional teams to deliver features end-to-end, from design to production, in fast-paced, Agile environments.

## SKILLS

- Frontend Development: React.js, Component-Based UI, State Management, Frontend–Backend Integration, Interactive Dashboards, Large Display Visualizations
- Frontend Development: React.js, Component-Based UI, State Management, Frontend–Backend Integration, Interactive Dashboards, Large Display Visualizations
- Databases & Data Storage: MongoDB, PostgreSQL, MySQL, Oracle, RDS, Data Modeling, Query Optimization
- Cloud & Deployment: AWS (Lambda, S3, ECS, RDS), Docker, CI/CD Pipelines, Netlify, Railway Deployment Platforms
- AI-Assisted Development: Cursor workflows, Data Preprocessing, ETL Pipelines, API Integration for AI systems
- Version Control & Collaboration: Git, GitHub, Agile / Scrum, Cross-Functional Collaboration
- Testing & Quality: Unit Testing, Integration Testing, PyTest, Code Reviews, Clean Architecture, Maintainable Code

## LANGUAGES

- English | Advanced
- Portuguese | Native
- Spanish | Intermediate

## EXPERIENCE

**SENIOR PLATFORM ENGINEER –  
PRIORITY PAYMENT SYSTEMS /  
BAIRESDEV** 2022 – PRESENT

- ALPHARETTA GA, US (REMOTE).
- Designed and maintained Node.js and Python backend services powering enterprise financial platforms with high throughput and low-latency requirements.
- Developed RESTful APIs and microservices integrated with React frontends for internal and customer-facing dashboards.
- Optimized real-time data pipelines for financial transactions and analytics.
- Deployed and managed services on AWS, ensuring high availability, monitoring, and scalability.
- Led CI/CD pipelines and end-to-end system deployments, supporting fast feature iteration.
- Collaborated closely with product, design, and data teams to ship customer-facing features reliably and efficiently.

**SAAS DEVELOPER (SOLO)** 2017 – PRESENT  
REMOTE

- Designed and maintained Node.js and Python backend services powering enterprise financial platforms with high throughput and low-latency requirements.
- Developed RESTful APIs and microservices integrated with React frontends for internal and customer-facing dashboards.
- Optimized real-time data pipelines for financial transactions and analytics.
- Deployed and managed services on AWS, ensuring high availability, monitoring, and scalability.
- Led CI/CD pipelines and end-to-end system deployments, supporting fast feature iteration.
- Collaborated closely with product, design, and data teams to ship customer-facing features reliably and efficiently.

**PLATFORM ENGINEER** 2022 – 2023  
NKEY. SANTA CATARINA RS, BRAZIL (REMOTE).

- Supported enterprise financial systems with automated backend services, APIs, and database workflows.
- Assisted in integration testing, data validation, and production deployments.
- Contributed to data migration and reporting pipelines, ensuring accuracy and consistency.

**AUTOMATION ENGINEER** 2022 – 2023  
BANK OF BRAZIL / GLOBALHITSS. BRASILIA DF, BRAZIL.

- Built internal business applications and SaaS tools with backend automation, APIs, and database integration.
- Participated in data conversion and migration projects involving Oracle and other relational databases.

**FULL STACK QUANT DEVELOPER** 2017 – 2018  
TSURU BOTS. TERESINA PI, BRAZIL (REMOTE).

- Built backend services and APIs using Java, Node.js, and Python to integrate multiple messaging platforms.
- Monitored and maintained production systems, debugging integration and API issues.
- Developed database models, stored procedures, and backend logic to support automated workflows.

**BACKEND DEVELOPER** 2016 – 2019  
APOLLO GAS. TERESINA PI, BRAZIL (REMOTE).

- Developed enterprise internal systems and POS applications using Java, PHP, and JavaScript.
- Built backend services, database queries, and stored procedures to support transactional workflows.
- Provided application support, debugging integration issues, and ensuring smooth production operations.

## EDUCATION

**IT TECHNICIAN**  
FEDERAL INSTITUTE OF MARANHÃO

**BACHELOR'S DEGREE IN ELECTRICAL  
ENGINEERING**

FEDERAL UNIVERSITY OF PIAUÍ

## CERTIFICATIONS & COURSES

AWS Certified Developer Associate

Certificate ID: AWS-DEV-2F9K3X-2024
